

Pocket Grease

LUBRICATION RANGE

Protective cleaner and lubricant in a convenient spray

Pocket Grease is a unique product that cleans, lubricates and protects using a liquid spray that converts to a grease film.

What is Pocket Grease?

Pocket Grease is a unique product that cleans, lubricates and protects using a liquid spray that converts to a grease film through evaporation.

Use Pocket Grease to keep machinery and metal work at optimum productivity by lubricating and preventing rust forming on any metallic surface.

Pocket Grease provides a durable, protective film that is impervious to salt, moisture and temperatures up to 200°C. Ideal for use on industrial machinery, chains, linkages, cars and boats.

How does Pocket Grease work?

Pocket Grease starts working almost instantly by reacting with the air and coating the target surface with a grease film that lubricates and protects against rust and corrosion.

Pocket Grease bonds tenaciously to metal, providing long-lasting protective effects unlike other products containing penetrating oils or silicon lubricants.

Key features and benefits of Pocket Grease?

- Product comes in a convenient spray formulation.
- 3-in-1 action; cleans, lubricates and protects.
- Tack-free, long-lasting grease film
- High pressure resistance.
- Salt water resistance.
- Heat resistant to 200°C.
- Eliminates rust and corrosion.
- Use for interior and exterior tasks.
- Bonds to metal surfaces and doesn't wear off.
- Ideal for all commercial and industrial purposes.

How to get the best results?

Spray a thin film onto the surfaces to be lubricated or penetrated.

To use on hard to reach areas insert the extension tube.

Allow 15 to 20 minutes for the product to fully cure.

Do not over spray onto painted or plastic surfaces to avoid damage.

If unsure about the surface material, test before use.
