

# Citronite

## Powerful, cleaner and disinfectant

### What is Citronite?

Citronite is a high-quality, hard surface cleaner and disinfectant with a lemon fragrance. Citronite is a safe, biodegradable cleaner that can be used on virtually any hard surface destroying contaminants on contact.

### How does Citronite work?

Citronite combines the unbeatable cleaning power of a broad spectrum disinfectant with degreasers and a fresh lemon fragrance which leaves hard surfaces spotlessly clean and hygienic. Citronite's effective but biodegradable formulation makes it totally safe and non-toxic, suitable for use in commercial, domestic and institutional premises.

### Product Information

Always ensure that precautionary measures found in the MSDS sheet for Citronite are read and followed before use.

### Key features and benefits of Citronite

- Effective cleaner and degreaser for all hard surfaces.
- Broad-spectrum disinfectant removes harmful bacteria, mildew and fungi.
- Fresh lemon fragrance.
- Can be applied via sprayer, cloth or mop.
- Safe and non-toxic
- Ideal for use in public areas such as offices, hotels, changing rooms, shower blocks and schools.
- Deodourise stairwells of flats and car parks.
- Sanitise houses, flats and rooms prior to re-letting.
- Use Citronite on stainless steel, plastics, ceramics, tiles, concrete and painted surfaces.

### How to get the best results

For best results put into a hand sprayer or attach a spray head to the bottle and adjust the nozzle to produce a fine spray.

Spray on the surface and leave for a few minutes before wiping off with a clean cloth/mop. For heavy or ground in dirt especially on porous surfaces like concrete, use a stiff brush or abrasive pad to work the Citronite in. Citronite can be used neat or diluted up to 10:1 with water.
