

SLIPSTREAM

A Remarkable New Sprayable White Grease

Grease & Lubricant

A new sprayable white grease that is a must for maintenance teams in a wide range of industries, including Automotive and Marine Engineering

What is Slipstream?

Slipstream is a remarkable aerosol applied white grease for multiple applications.

Slipstream provides protection against:

- Wear
- Corrosion
- Water/steam and chemicals

Due to its multifunctional formula Slipstream can be used just about anywhere.

Key features and benefits of Slipstream

Sprayable - goes where you spray it, and stays where you spray it.

Non staining.

White - easy to see where product has been applied.

Waterproof - will not wash off.

For use indoors and outdoors.

Protects against, salt, condensation, water, corrosive fumes and gases.

Great value for money.

Does not harden and oxidize.

Odourless, tasteless, safe to use almost anywhere.

Who would use Slipstream?

Garages, coach and train operators, production factories, farms, agricultural engineers, industrial fitters, crematoria, ferry operators, hotels, schools and colleges, boat yards, marinas, groundsmen, caravan site maintenance, water treatment and sewage plant engineers.

Where would you use Slipstream?

Locks and hinges, drive shafts, door closer mechanisms, wire rope ways, outboard and in board motors, roller shutter doors, curtain sided vehicles, caravans, car seat slider mechanisms, bearings, pulleys, electrical switchgear, conveyor systems and protecting bolts against corrosion.
