

Grafter

Graffiti, adhesives and chewing gum remover

Probably the most powerful formulation ever put into an aerosol. Grafter's mixture of solvents will quickly remove graffiti, adhesives and chewing gum from any surface.

What is Grafter?

Grafter is a fast-acting, multi-purpose product that cuts through adhesives and paint without the use of dangerous chlorinated chemicals. Use Grafter on a range of surfaces to remove graffiti, chewing gum, gasket residues and even paint. This versatile product clings even to vertical surfaces and is easily rinsed away with water.

How does Grafter work?

Grafter is a blend of hard-working solvents which work together in synergy to instantly penetrate, loosen and dissolve paint and adhesive. Grafter is a gel formulation so it can be used on vertical surfaces without waste. Use Grafter on a huge range of surfaces including, brick, cement, ferrous metal, non-ferrous metal and even textiles that have been pre-tested for compatibility.

Product Information

Always ensure that precautionary measures found in the MSDS sheet for Grafter are read and followed before use.

Key features and benefits of Grafter

- Versatile product can be used on a range of adhesives and paints
- Fast, powerful cleaning action with no dangerous chlorinated chemicals.
- Gel formulation is ideal for use on vertical surfaces.
- Removes chewing gum, graffiti, glues/adhesives, marker pen, inks, stickers, gasket residues, and sealant residues.
- Grafter can even be used as a conventional paint stripper.
- Grafter can be used on: stone, glass, reinforced plastic, brick, cement, ferrous metal, non-ferrous metal and even textiles that have been pre-tested for compatibility.

How to get the best results

Protect areas from unwanted overspray, wear gloves and goggles if working outside. Protect floors from chemical drips. Have a container to scrape the softened paint or residues into. Have plenty of cloths or paper towels to keep the area clean. Wipe the stripped surfaces with a damp cloth and sandpaper before repainting.
