

Professional Range

Exocet

Granular caustic drain opener

DRAIN OPENER

DRAIN MAINTAINER

A lemon scented, strong caustic granule that will clear drains of grease, oils, fat and hair

What is Exocet?

Exocet clears grease, oil, fat, soap and hair from blocked or slow running drains using a unique thermo-reactive granule formulation. Exocet eliminates the need for caustic liquids and dangerous acid solutions. The granular formulation prevents any hazardous splashing and its lemon fragrance leaves the area smelling clean and fresh.

How does Exocet work?

Exocet's thermo-reactive granules are activated when they come into contact with water. This exothermic reaction produces heat which quickly breaks down and removes organic matter. You can accelerate this process by adding tepid water after you have introduced the granules.

The granules are heavier than water enabling Exocet to sink to problem areas to relieve blockages or slow running drains, quickly and effectively.

pH
14
 Strongly Alkaline

Key features and benefits of Exocet.

- Quickly dissolves organic matter such as fat, grease and hair which can block sinks, drains and water waste pipes
- Safer than using harmful acids
- Easy flow, granular formulation prevents any dangerous splashing
- Ideal for use in domestic, institutional and commercial premises
- Leaves a fresh lemon fragrance after use
- Prevents build up and reduces likelihood of expensive drain rodding or jetting services
- Prevents slow running drains which are a health hazard and major cause of bad odours

How do you use Exocet?

Before use, it is important that you have read the Safety Data Sheet in its entirety and that you are wearing protective goggles and gloves.

Simply introduce a single dose (30ml) of Exocet to the sink, toilet or drain. Allow to stand for 10 minutes, flush well with water and repeat if necessary.

Use regularly in areas prone to accumulation of grease, fat, oil, soap and hair to prevent build up and to keep drains open and smelling fresh.

- ✗ Do not mix with other products.
- ✗ Do not use on aluminium or galvanised metal.
- ✗ Do not lean directly over the dosing area.
