

best in its field - no bull!

Dymonite

Heavy duty hard surface cleaner and degreaser.

TECHNICAL DATA SHEET **RED RAG**

INDUSTRIALMAINTENANCEGROUP

A one stop product for use from the kitchen to the workshop

What is Dymonite?

Dymonite is a highly concentrated, super powerful, biodegradable cleaner that can be used on virtually any hard surface. Dymonite is highly effective even when diluted up to 50:1. The non-toxic formulation has an indefinite shelf life which makes this product extremely economical.

How does Dymonite work?

Dymonite Concentrate contains alkalis and detergents which break down contaminants, whilst high quality emulsifiers suspend grease and dirt allowing them to be washed away. The powerful formulation includes amphoterics which aid the removal of grime and speed up the cleaning process.

Product Information

Always ensure that precautionary measures found in the MSDS sheet for Dymonite Concentrate are read and followed before use.

Key features and benefits of Dymonite

- Powerful even at a high level of dilution.
- Water based and non-flammable.
- Fully biodegradable.
- Indefinite shelf life.
- Contains additives allowing safe use on metal surfaces.
- Huge range of applications.
- Removes heavy duty grease and dirt.
- Ideal for degreasing machinery.
- Completely safe to use on virtually all hard surfaces
- Use Dymonite Concentrate to remove: Nicotine residue, Sap deposits on blades, saws and planers, Carbon deposits from metal surfaces.
- Virtually no odour'

How to get the best results

For quick effective cleaning of hard surfaces (not glass), put a 10:1 dilution in a hand sprayer, adjust the nozzle to produce a fine spray. Spray the soiled surface, leave for a few seconds and then wipe off with a clean absorbent cloth.

If soiling is very heavy, use hot water in the 10:1 dilution and apply by mop or cloth.

For use with a pressure washer, dilute at 50:1 with either hot or cold water, depending on level of soiling.
