

SANI GEL

FAST-ACTING, GERM-KILLING ALCOHOL BASED HAND SANITISER

What is Sani-Gel?

Sani-Gel is a powerful alcohol-based hand gel which kills 99.9% of harmful germs and bacteria from the hands, before they spread. Perfect for use in the workplace, offices, supermarkets, house – anywhere!

How does Sani Gel work?

Sani Gel's alcohol formula starts to attack bacteria on the hands upon application. The gel breaks down the skin's surface biofilm allowing the antimicrobial agent to attack and kill unwanted bacteria.

Instructions for Use

Ensure hands are dry. Apply a pea sized amount of Sani Gel to the palm of one hand and rub hands together, ensuring Sani Gel is applied to the fronts and backs of hands. Allow Sani Gel to dry completely to ensure hands are fully sanitised.

Health and Safety

Before use, it is important that the SDS is read in its entirety and any warnings are noted before the product's use.
