

best in its field - no bull!

Sani-Gel

Fast-acting sanitiser.

A revolutionary gel that leaves hands free of germs and bacteria

What is Sani-Gel?

Sani-Gel is a powerful hand sanitiser which kills a wide spectrum of harmful bacteria and organisms before they have the chance to spread. The on-going threat harmful bacteria and germs pose is a major concern for any work-place, institution, or commercial organisation. It is essential to halt the spread of antibiotic resistant contaminants such as e-coli and MRSA and provide a safe, hygienic environment for all.

How does Sani-Gel work?

From the moment that Sani-Gel is applied to the hands it goes to work on germs and bacteria. The alcohol-based gel formula breaks down the skin's surface biofilm allowing the antimicrobial agent to attack and kill unwanted germs. Once sanitised, emollients in Sani-Gel leave hands soft.

Product Information

Always ensure that precautionary measures found in the MSDS sheet for Sani-Gel are read and followed before use.

TECHNICAL DATA SHEET RED RAG

INDUSTRIALMAINTENANCEGROUP

Key features and benefits of Sani-Gel

- Kills full spectrum of harmful bacteria and organisms instantly.
- Halts the spread of potentially fatal illnesses. Effective against antibiotic resistant strains such as:
 - Staphylococcus aureus (incl. MRSA), Escherichia coli, P. Aeruginosa, Salmonella typhi, Candida albicans, Trichophyton mentagrophytes, Listeria monocytogenes.
- Ideal for use in medical centres, nursing homes, hotels, leisure centres, schools, food preparation premises and kennels.
- No water or cleaning cloths required, simply rub onto hands.
- Suitable for all skin types.
- Contains emollients to keep skin soft.

How to use Sani-Gel

Follow the instructions on the label.
