VIRAKILL MINI

FOR YOUR PERSONAL PROTECTION

How do I use Virakill?

Hands: Simply spray one spray of Virakill onto the palm of one hand. Rub hands together ensuring backs and in between fingers are covered. Wait for Virakill to dry.

Touch points: Spray directly onto touch points such as car door handles, door handles etc. and spread across surface with non-absorbent cloth. Leave to dry completely.

How does Virakill work?

Virakill forms an antimicrobial coating on a surface. It contains polymers that repel microorganisms, germs, bacteria, viruses etc., that want to land and colonise on surfaces. This coating gives lasting protection, continuing to protect against bacteria and viruses for up to 8 days. If it is a surface that you use a lot, or it is a heavily soiled area, then we would always recommend cleaning the surface again before you use it.

Microfiber cloth - washing Instructions

No Softener / No Bleaching.
70% polyester, 30% polyamide

Non-absorbent cloth - washing instruction
