# SANI GEL CALM

**Finely Fragranced Anti-bacterial Hand Sanitiser  
For Fresh and Clean Hands**

## What is Sani Gel Calm?

Sani Gel Calm is a fragranced and powerful alcohol-based hand gel which kills 99.9% of harmful germs and bacteria from the hands before they spread. Finely fragranced with chamomile, eucalyptus, lavender and patchouli oils, this calming hand sanitiser leaves hands smelling fresh and feeling clean between washes. Sani Gel Calm has been specially formulated by our in-house Chemist and is manufactured on site, making it a truly unique product that is not available elsewhere on the market.

Available in 100ml pocket size bottles and 500ml bottles – Sani Gel Calm is perfect for use in the workplace, offices, supermarkets, house and anywhere when you are out and about.

## How does Sani Gel Calm work?

Sani Gel Calm's alcohol formula starts to attack bacteria on the hands upon application. The gel breaks down the skin's surface biofilm allowing the antimicrobial agent to attack and kill unwanted bacteria. Once dry, Sani Gel Calm will leave a lovely, calming fragrance on your hands, lasting between washes.

## Instructions for Use

Massage a pea sized amount of Sani Gel Calm into dry hands including fronts, backs and fingertips. Allow to dry completely to ensure hands are fully sanitised.

## Health and Safety

Before use, it is important that the SDS is read in its entirety and any warnings noted before the product's use.

IMG are partnering with our friends in South Africa to donate one mask for every bottle of Sani Gel Calm that you buy. We will donate these masks to communities in need in South Africa, where there are severe shortages of resources to combat the spread of coronavirus. Whilst the COVID-19 pandemic has affected all of us, it has left the most vulnerable and poorest communities in the world in a helpless and desperate situation. Thank you for helping us provide some relief to some of those communities by buying this bottle of Sani Gel.
