Cherry Spritz

A fine mist spray that when polished leaves a bright glossy finish and cherry scent

What is Cherry Spritz?

Cherry Spritz is a multipurpose Polish spray that works to create a fine mist that is sprayed directly onto a variety of surfaces, and polished with a soft microfiber cloth or duster. The specially formulated solvent free solution will leave a bright gloss, protection from stains, anti-static surface, and a sweet cherry scent.

Instructions for use

Spray a fine mist from approx. 20cm from surface to be treated. After a few seconds, polish with a microfibre cloth or soft duster. To prevent unwanted spray onto other surfaces, spray onto cloth/duster and apply as required, then polish with another cloth.

How does Cherry Spritz Work?

Cherry Spritz works to create a fine mist that is sprayed directly onto a variety of hard surfaces, and polished with a soft microfiber cloth or duster. The specially formulated spray gently lifts dust, leaves a bright gloss, protects from stains, leaving behind a sweet cherry scent.

How to get the best results

All non-porous hard surfaces, including plastic, wood not requiring a wax coating, imitation leather, all surfaces prone to dust needing a bright gloss finish, and many more.
