

ISO CLEAN SPRAY

SOMETIMES ATTACK IS THE BEST FORM OF DEFENCE!

ISO Clean Spray leaves any surface streak free as well and clean and fresh.

The perfect multi-purpose cleaning spray for any surface, desktop, door handle, and many more.

What is ISO Clean Spray?

A 70% Isopropyl alcohol based spray is most commonly used within pharmaceuticals, hospitals, cleanrooms, electronics and many more.

This simple yet powerful formulation is EN 1276 standard certified to leave your surface clean in less than 1 minute.

This quick and easy multi-purpose spray can be used on any hard surfaces, from desktops, door handles, gym equipment, electronic and medical devices and many more.

How does it work?

The strong alcohol and water based formulation is perfectly tested to laboratory EN 1276 standards, where the alcohol cleans the surface and the water inhibits any further growth, leaving your surface clean and protected in under 1 minute.

A 70% based formulation is recommended to penetrate cell walls more completely in comparison to other formulations, alongside a lower water content increasing evaporation time and increasing surface contact time.

How to get the best results

Simply spray directly onto the surface and leave for 1 minute, before using a microfiber cloth to wipe the surface clean. The trigger head spray is designed to increase contact surface area and leave all your surfaces fresh and clean.

If an area is heavily soiled, remove excess soiling before cleaning.

Key features and benefits of ISO Clean Spray

- ✓ Quick and easy to use.
- ✓ Most highly recommended formulation concentrations.
- ✓ Laboratory tested to EN1276 standard.
- ✓ Suitable for all hard surface areas including; ceramics, porcelain, chrome, plastic, walls, tiles, fixtures, toilet and surrounding areas, sinks, urinals, electronic and medical devices, and many more.
