

# Safe & Sound

## Securing broken glass in minutes

### A quick and easily applied protective shield for broken glass

#### What is Safe & Sound?

Safe & Sound is a major advance in protective technology. A clear plastic film that has incredible tensile strength for security. A strong adhesive on one side of the film that holds broken glass like a vice.

#### How does Safe & Sound work?

Quickly cutting and sticking the strong laminated film on any broken window pane or mirror provides instant security, whilst preventing loose glass from becoming a danger. Safe & Sound can be applied without expensive application equipment making it the perfect emergency tool.

#### Where would you use Safe & Sound?

Single or double glazed units. Glazed doors and internal glass partitions. Mirrors. Any emergency, where public safety requires making an area safe from broken or falling glass.

#### Key features and benefits of Safe & Sound

- Takes only seconds to apply.
- Super strong, providing security.**
- Minimal reduction in visibility.
- Applied silently, reducing disruption.**
- Broken glass, quickly made safe, provides peace of mind.
- Cost effective, no need call out contractors to put up expensive and damaging boarding. High emergency call out fees become a thing of the past.**
- Allows you to replace the glass when it is convenient for you.
- As it's stuck together in one piece.**
- Measured grid makes cutting accurate and easy.
- Protects against the elements.**

#### How do you apply Safe & Sound?

- So easy anyone can apply it.
- Measure** the area of glass that needs to be made secure.
- Cut** the required amount of Safe and Sound.
- Apply** the Safe & Sound onto the glass using gloves and smooth down with a roller or cloth.
- Large areas of broken glass can be overlapped to cover the area securely.
