Tough Towel Wipes

Reusable microfiber towels for superior surface cleaning

Lint free dry wipers made from microfibers. Absorbent, soft, strong, and reusable. These wipes have the versatility of rags, but better, more convenient and more cost effective.

What are Tough Towel Wipes?

What are the fundamental differences between wipes and rags? Well, wipes are consistent, and they are designed for a specific purpose, and so will excel in certain properties. They sometimes for convenience, will come on a roll, so you can tear off however many sheets you need. On the other hand, rags tend to come in all shapes, sizes, and materials. Generally, they will be thicker, making them excellent for getting at tough stains, hence their use in the automotive industry.

How do Tough Towels work?

Tough Towels are the most unique and luxurious dry wipers on the market today. Their microfiber technology makes them incredibly tough and strong, but also super absorbent and smooth. These features make Tough Towels so versatile, that you'll wonder how you ever did without them! Its material is bonded so well that these wipes are non-linting, even after washing for further use. Each roll of wipes has 50 squares, which can be used up to 50 times in between washes. You don't have to be good at maths to know this is a seriously good product!

What if you could get the best of both worlds? What if you could have a roll of wipes that are incredibly strong, absorbent, soft, reusable, and cost effective? Now you can, with Red Rag's Tough Towels!
