What is Floc-Unblock?

Floc-Unblock is the ultimate solution for maintaining clean and efficient drainage systems. This powerful drain unblocker is specifically designed to target mud, silt, detergents, and other solids dispensed in liquids, ensuring your pipes remain clear and functional.

Floc-Unblock provides cleaner lines with significant labour savings. It effectively clears backed-up and overloaded sewers, removes detergents solidified by changing temperatures, and breaks up deposits of fine and coarse sand and shale. Additionally, it prevents the build-up of materials on all surfaces in cooling towers, enhancing their efficiency and reducing pumping costs.

Choose Floc-Unblock for a reliable, eco-friendly, and efficient way to keep your drainage systems in top condition.

How does Floc-Unblock work?

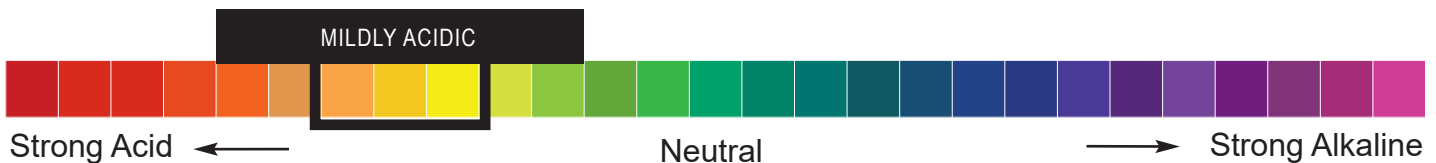

This product has an advanced flocculant-based formula, which ensures that even the most stubborn blockages are effectively loosened and flushed away, restoring optimal flow in your pipes.

It contains a strong bactericide that is effective against both gram-positive and gram-negative bacteria, preventing unpleasant odours and ensuring a hygienic environment. This product is safe to use on metal, plastic, and earthenware pipes, posing no pollution problems and being completely biodegradable.

Floc-Unblock contains no strong acids or alkalis, making it safe for all systems. It features a fluorescent dye for visual detection of through-flow, ensuring thorough cleaning. This non-flammable product does not upset the chemical balance of other treatment agents and eliminates the need for mechanical and acid cleaners, providing a comprehensive solution for maintaining clinically clean pipes.

Key Features and Benefits of Floc-Unblock:

- Safe to use drain unblocker – no strong acids or bases, non-flammable.
- Flocculant product, targets mud, silt, detergents or other solids dispensed in liquids.
- Loosens & flushes silt & soiling from drainage systems.
- Prevents unpleasant odours.
- Completely biodegradable and poses no pollution hazard.
- Removes detergents solidified by changing temperatures.
- Safe on metal, plastic & earthenware pipes.
- Does not upset chemical balance of other treatment agents.
- Eliminates the need for mechanical & acid cleaners.

Typical Applications of Floc-Unblock:

- Sewer lines and drainage systems.
- Cooling towers.
- Hospitals and educational establishments.
- Food industries, creameries, dairies etc.
- Agricultural settings.
- Situations where clinically clean pipes are essential.

Health and Safety:

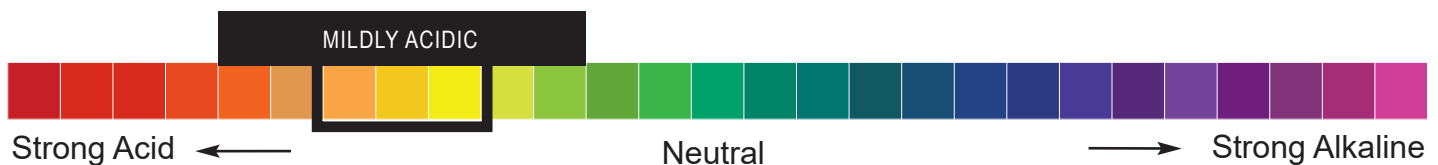

Before use, it is important that you have read the Safety Data Sheet in its entirety and are wearing suitable eye protection.
 pH 3/4 – Mildly Acidic

How to Use:

Shake container well before use. Immediately remove the cap and pour 500ml of Floc-Unblock into the water source or system. Agitate or stir the water source if stationary to ensure mixing. Allow product to work for at least 2 hours before increasing the dosage. Heavy deposits may require several treatments.
